CONDITIONAL RADAR DATA LICENSE AGREEMENT

LICENSE NUMBER: [Insert Unique Identifier]
LICENSOR: [PROVIDER NAME], located at [Licensor Address]
LICENSEE: [RECIPIENT NAME], located at [Licensee Address]

This Data License Agreement (the "License") governs the terms under which Licensor grants a highly restrictive, conditional license to Licensee for the use of specialized meteorological radar data assets.

---

1. DEFINITION OF LICENSED DATA

The subject of this License consists of raw or processed radar datasets (including but not limited to reflectivity, velocity, dual-polarization variables, and derived products, hereinafter referred to as the "Licensed Data") provided by the Licensor via [e.g., FTP, API, cloud bucket].

2. CONDITIONS OF GRANT & PRIOR PERMISSION

- **Prior Written Activation: The execution of this License does not grant immediate access to the Licensed Data. Delivery or transmission of the data feeds will only occur after separate, explicit written activation/permission is issued by the Licensor.**
- **Revocability: This License is non-exclusive, non-transferable, and fully revocable at the sole discretion of the Licensor if any provision herein is violated.**

3. PROHIBITION ON TRANSFER & REDISTRIBUTION

- **Strict Non-Distribution: Licensee is granted a license for internal use only. Licensee shall not sell, lease, sub-license, rent, assign, redistribute, or disclose the Licensed Data, in whole or in part, to any third party outside the strict boundaries of this License.**
- **Access Control: Licensee must restrict access to the data strictly to authorized personnel and implement security protocols to prevent external leaks or scraping of the radar feeds.**

4. MANDATORY RECIPIENT DISCLOSURE (SHARING OF RESULTS)

- **Results-Sharing Covenant: As a material condition of this License, the Licensee is legally obligated to share all results, analytics, scientific findings, system validations, and software testing metrics derived from the use of the Licensed Data back with the Licensor.**
- **Delivery Window: Such results must be delivered to the Licensor in a clear, written format within [e.g., 30/60] days of their generation or internal completion.**

5. MANDATORY DATA SOURCE ACKNOWLEDGEMENT

- **Attribution Requirement: The Licensee must prominently provide explicit public acknowledgement of the data source on all published materials, research papers, websites, dashboards, map viewers, presentations, or any other publicly accessible content that utilizes, displays, or is derived from the Licensed Data.**
- **Standard Attribution Text: Unless otherwise specified by the Licensor in writing, the mandatory public citation and attribution text must read exactly as follows:**

"Source: Sea surface drone data provided courtesy of Barbados Meteorological Services. All rights reserved."

6. COMMERCIAL & NON-PROFIT DOWNSTREAM PRODUCTS

- **Permitted Scope: Licensee is authorized to develop downstream products, software tools, or operational forecasting services arising from the use of the Licensed Data for both profit (commercial) and non-profit (academic/operational) purposes.**
- **Mandatory Derived License Requirement: While the initial development activity is permitted, Licensee shall not launch, sell, or deploy any such commercial or non-profit products/services publicly until the parties execute a separate, mutually binding Derived License Agreement that defines specific royalties, intellectual property boundaries, or service-level terms.**

7. TERM, REVIEWS, AND TERMINATION

- **Term: This License shall remain in effect for a period of [e.g., 3] years from the date of final signature.**
- **Post-Termination Destruction: Upon termination or expiration of this License, all data feeds will be severed. Licensee must immediately delete and purge all archival caches of the raw Licensed Data from its systems, unless expressly permitted otherwise under an active Derived License Agreement.**
