UPDATED: A HIGH-WIND ADVISORY IS IN EFFECT FOR BARBADOS.

Issued: Wed, 12 Feb 2025 05:58 AM

Moderate to strong winds are currently affecting Barbados today Tuesday, February 11th 2025 and will continue for the remainder of the week. Therefore, the Barbados Meteorological Services has extended the Wind Advisory.

THIS IS NOT ASSOCIATED WITH A TROPICAL STORM/ HURRICANE

****** Hazard Info ******

Possible Impacts

Expect tumbling or rolling of unsecured objects (e.g. inflatable structures, tents and garbage cans).

What you Should do

The public is encouraged to monitor the BMS, DEM and GIS websites and their respective social media pages along with the local media networks for further information on what you should do.

Discussion

A strengthening Atlantic High-pressure system is dominant across Barbados and the region. Moderate to strong winds of 20 to 30 knots (37 to 56 km/h), associated with this feature are affecting the island. Additionally, higher gusts are expected near showers.

General Information

A high-wind advisory is issued when sustained winds of 25 to 33 knots (47 to 61km/h) are affecting or forecast to affect the land area within 36 hours. This High-wind Advisory was issued at 10:00 am, Tuesday, 11th February 2025 and will be updated at noon, Wednesday, 12th February, 2025.
