

BARBADOS METEOROLOGICAL SERVICES

Mean Dry Bulb Temperature Outlook for June 2020 to August 2020

AN = Above Normal

N= Normal

BN= Below Normal

The circles indicate stations with temperature data in excess of 30 years.

The map showing the mean dry bulb temperature for the season June 2020 to August 2020 is forecasted to be above normal for CIMH and GAIA/Charnocks.

Please be advised that the outlook maps for rainfall and the 6-month drought outlooks will be unavailable in this album due to the introduction of the Barbados Climate Outlook Newsletter. In addition, the above outlooks for mean maximum and mean minimum temperatures can be found by typing the link below.
